

Beloved, Love Creation.

Written Testimonial - "Love of God's Creations"

These words written by (Jenny Uglow) really touched me...

"We may think we are nurturing our garden, but of course it's our garden that is nurturing us!"

The word testimonial is described in the dictionary as *affirmation, support, witness and evidence.*

So many years ago, our founding church leaders must have realized the beauty of our location for the site of our church. Today we can see the same beauty and natural setting that they saw. So, the story began. We still see the native flowers, trees, weeds, grasses and wildlife galore. Sauk Creek is quite a special fishing hole for young and old. Creekside Commons is open to the public and a pathway is mowed to the water's edge.

We at First Congregational Church set into motion the respect and care of God's creations by binding us all together to their care and nurture for generations to come.

This year a program to adopt an area to tend and keep weed free seemed to work so well. We got our hands dirty and met other members doing the same. Once again what is nurturing who?

Now I better understand the importance of the words of God's Love of Creation as expressed in the Bible. Please support the creation that is found within and around our special church. Support what you love!
